Data Breaches

What should you do if your data has been breached?

2 Check if your personal data is in the public domain - you can use our free Data Breach Checker.

1 Change your passwords - don't use birthdays or pet's names as they can easily be guessed. Try using passwordsgenerator.net

3 Contact your bank/credit card company - check there hasn't been any suspicious activity.

4 Report the breach to the ICO - this can be done on their website.

6 Get in touch - for a free consultation to discuss your options and compensation.

5 Take legal action - our Cyber Security Solicitors can work on a No Win, No Fee basis.
